For : Production of Antibodies in Transgenic Plastids

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

AMENDMENT UNDER 37 CFR §1.111

Sir:

A petition and fee for a three-month extension of time through and including December 8, 2003 accompanies this response.

In response to the Office Action mailed June 6, 2003 in the application identified above, Applicants make the following amendment, remarks, and submissions:

In the specification:

Please substitute the following paragraphs:

Page 4, lines 27-31:

In summary, the plastid genome is thus an attractive target for introduction and expression of antibody genes. The reasons include: 1) capacity for extraordinarily high levels of foreign protein expression, 2) ability to fold, process and assemble eukaryotic proteins, 3) simpler purification, 4) containment of foreign genes through ~~material~~maternal inheritance and 5) no glycosylation.
